

Virginia Title V Operating Permit

Until such time as this permit is reopened and revised, modified, revoked, terminated or expires, the permittee is authorized to operate in accordance with the terms and conditions contained herein. This permit is issued under the authority of Title 10.1, Chapter 13, §10.1-1322 of the Air Pollution Control Law of Virginia. This permit is issued consistent with the Administrative Process Act, and 9 VAC 5-80-50 through 9 VAC 5-80-300 of the State Air Pollution Control Board Regulations for the Control and Abatement of Air Pollution of the Commonwealth of Virginia.

Authorization to operate a Stationary Source of Air Pollution as described in this permit is hereby granted to:

Permittee Name:	Lasco Bathware Inc.
Facility Name:	Lasco Bathware Inc.
Facility Location:	Lots 5 and 7 Halifax Industrial Park South Boston, Virginia
Registration Number:	30794
Permit Number:	SCRO30794

September 14, 2001
Effective Date

September 14, 2006
Expiration Date

September 20, 2005
Amendment Date

Robert G. Burnley
Director, Department of Environmental Quality

I. Facility Information

Permittee

Lasco Bathware Inc.
8101 E. Kaiser Blvd., Suite 130
Anaheim, CA 92808

Responsible Official

Scott Hartman
Plant Manager

Facility

Lasco Bathware Inc.
Lots 5 and 7 Halifax Industrial Park
South Boston, VA 24592

Contact Person

Viktor Prismantas
Environmental Manager
(714) 993-1220 x428

County-Plant: 51-083-0037

Facility Description: NAICS 326191 – This facility's production consists of fabrication of fiberglass reinforced bath fixture molds and fiberglass reinforced acrylic bathtubs/showers.

II. Insignificant Emission Units

The following emission units at the facility are identified in the application as insignificant emission units under 9 VAC 5-80-720:

Emission Unit No.	Emission Unit Description	Citation	Pollutant(s) Emitted (9 VAC 5-80-720 B)	Rated Capacity (9 VAC 5-80-720 C)
G38	Hastings LB-3	9 VAC 5-80-720 C		0.36 Mbtu
G39	Hastings LB-6	9 VAC 5-80-720 C		0.468 Mbtu
G40	Maxon heater	9 VAC 5-80-720 C		0.55 Mbtu
A41	Hastings LB-50	9 VAC 5-80-720 C		4.70 Mbtu
A42	Hastings LB-3	9 VAC 5-80-720 C		0.36 Mbtu
AG36	Natural gas heater	9 VAC 5-80-720 C		0.06 Mbtu
H-1	Natural gas heaters	9 VAC 5-80-720 C		2.066 Mbtu
H-2	Natural gas heaters	9 VAC 5-80-720 C		3.099 Mbtu
H-3	Natural gas heaters	9 VAC 5-80-720 C		0.387 MBtu
OA6	Part assembly area	9 VAC 5-80-720 B	VOCs	
OA8	Mold cleaning	9 VAC 5-80-720 B	VOCs	
A31	Part assembly area	9 VAC 5-80-720 B	VOCs	
A31	Mold cleaning	9 VAC 5-80-720 B	VOCs	

These emission units are presumed to be in compliance with all requirements of the federal Clean Air Act as may apply. Based on this presumption, no monitoring, recordkeeping, or reporting shall be required for these emission units in accordance with 9 VAC 5-80-110.

III. Emission Units

Equipment to be operated consists of:

Emission Unit ID	Stack ID	Emission Unit Description	Size/Rated Capacity*	Pollution Control Device (PCD) Description	PCD ID	Pollutant Controlled	Applicable Permit Date
FRP Line							
G1	S1	Lasco Designed Spray booth	4032 lbs/hr	Reeco Model F thermal oxidizer	-	Styrene	11/29/1984 amended 9/15/95, 4/7/03, and 4/21/05
G2	S2	Lasco Designed Spray booth	4032 lbs/hr	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G3	S3	First cure room, Lasco designed	Unknown	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G4	S3	First LAM Prep station	Unknown	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G5	S1	Lasco Designed Spray booth	4032 lbs/hr	Reeco Model F thermal oxidizer	-	Styrene	11/29/1984 amended 9/15/95, 4/7/03, and 4/21/05
G6	S4	First LAM roll	9.0 lbs/hr	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G7	-	1 st LAM cure and trim	Unknown	-	-	-	11/29/1984 amended 9/15/95 and 4/7/03
G8	S4	2 nd LAM prep station	398 lbs/hr	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G9	S1	Lasco Designed Spray booth	4032 lbs/hr	Reeco Model F thermal oxidizer	-	Styrene	11/29/1984 amended 9/15/95, 4/7/03, and 4/21/05
G10	S3	2 nd LAM roll	5 lbs/hr	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G11	-	2 nd Cure room, Lasco designed	Unknown	-	-	-	11/29/1984 amended 9/15/95 and 4/7/03
G12	-	Part Pull	2254 ft ² /hr	-	-	-	
G13	S1	Mold Prep Station	0.5 lbs/hr	Reeco Model F thermal oxidizer	-	Styrene	
G14	S5	Trim booth	2254 lbs/hr	Polyester filter media	-	PM	11/29/1984 amended 9/15/95 and 4/7/03
G15	-	Final inspection	2254 lbs/hr	-	-	-	
G16	-	Part repair	0.2 lbs hr	-	-	-	

Emission Unit ID	Stack ID	Emission Unit Description	Size/Rated Capacity*	Pollution Control Device (PCD) Description	PCD ID	Pollutant Controlled	Applicable Permit Date
G36	-	Space heater	5.74 MBtu	-	-	-	11/29/1984 amended 9/15/95 and 4/7/03
Acrylic Line

OA10		Hydro test	6,480,000 ft ² /yr	-	-	-	2/8/1994 amended 3/27/98

*The Size/Rated capacity [and PCD efficiency] is provided for informational purposes only, and is not an applicable requirement.

IV. Process Equipment Requirements – (G36, G37) Hastings direct-fired makeup air heaters

A. Limitations

1. The approved fuels for the Hastings direct-fired makeup air heaters are natural gas and propane. A change in the fuels may require a permit to modify and operate.
(9 VAC 5-80-110 and Condition 7 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)
2. Emissions from the operation of the two Hastings direct-fired makeup air heaters combined shall not exceed the limits specified below:

Nitrogen Dioxide	1.18 lbs/hr	5.14 tons/yr
Carbon Monoxide	0.22 lbs/hr	1.04 tons/yr

Annual emissions are to be calculated monthly as the sum of each consecutive twelve (12) month period.
(9 VAC 5-80-110, 9 VAC 5-50-260 and Condition 4 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)

B. Recordkeeping

The permittee shall maintain records of all emission data and operating parameters necessary to demonstrate compliance with this permit. The content and format of such records shall be arranged with the South Central Regional Office. These records shall include, but are not limited to: annual usage of natural gas and propane, calculated monthly as the sum of each consecutive twelve (12) month period. These records shall be available on site for inspection by the DEQ and shall be current for the most recent five (5) years.
(9 VAC 5-50-50 and 9 VAC 5-80-110)

C. Testing

The permitted facility shall be constructed so as to allow for emissions testing at any time using appropriate methods. Upon request from the Department, test ports shall be provided at the appropriate locations.
(9 VAC 5-50-30 and 9 VAC 5-80-110)

V. Process Equipment Requirements – (G1 - G16) FRP line, and (A17-A31, AG32 - AG 34) acrylic line

A. Limitations

1. VOC emissions from the gel coat line laminating spray stations and the gel coat spray operation shall be controlled by a Reeco Model F thermal oxidizer (RTO). The RTO shall be provided with adequate access for inspection.
(9 VAC 5-80-110 and Condition I.3 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)
2. The approved fuels for the RTO are natural gas and propane. A change in the fuels may require a permit to modify and operate.
(9 VAC 5-80-110 and Condition I.7 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)
3. The maximum volatile organic compound emissions shall not exceed 174.0 lbs/hr, but on an overall annual basis the average emissions rate shall not exceed 152 lbs/hr and 226 tons/yr.
(9 VAC 5-80-110 and Condition I.5 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)
4. The RTO shall operate in accordance with the following specifications:
 - a. The RTO will destroy at least 95 percent of the organic compounds and vapors entering the unit.
 - b. The RTO will operate at a minimum temperature of 1400°F. The RTO shall be equipped with a device (thermocouples) for the continuous measurement and recording of the temperature in the central chamber.
 - c. The RTO's residence time shall be a minimum of 0.4 seconds and shall average 1.0 seconds.
 - d. Sufficient excess air will be introduced into the unit (if necessary) to insure proper oxidation of the organic compounds and vapors.
 - e. Repair parts of high usage items shall be maintained at the plant to reduce the length of any repair time.
 - f. All piping, valves and associated equipment will be properly maintained to minimize fume leakage.

(9 VAC 5-80-110 and Condition I.10 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)

5. In addition to incineration, volatile organic emissions shall be reduced by using the following:

- a. The use of airless sprays.
- b. The use of suppressed resins.
- c. High filler content resin systems.
- d. Minimum styrene content resins.
- e. Overspray collection through dry filter media.
- f. Negative pressures in the process room to control fugitive emissions.
- g. Close control of material consumption.
- h. The use of elevated exhausts and high exit velocities.

(9 VAC 5-80-110 and Condition I.11 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)

6. All uncontrolled process stacks (excepting trimming and parts repair) shall be at least 58' high and have a stack velocity of at least 4000 feet per minute.

(9 VAC 5-80-110 and Condition I.13 of November 29, 1984 permit, amended September 15, 1995, April 7, 2003, and April 21, 2005)

7. The mixing process shall be controlled by a fabric filter.

(9 VAC 5-50-10 D.)

B. Monitoring

1. The RTO shall be equipped with a device to continuously measure the temperature in the combustion zone as well as a means of determining gas discharge flow.

(9 VAC 5-80-110 and Condition I.6 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)

2. The permittee shall develop, in writing, maintain, and have available to all operators good operating procedures for all air pollution control equipment. A maintenance schedule for all such equipment will be established and made available to the DEQ for review.

Records of service and maintenance will be maintained by the source for a period of two (2) years.

(9 VAC 5-80-110 and Condition II.7 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)

C. Recordkeeping

1. The permittee shall maintain records of all emission data and operating parameters necessary to demonstrate compliance with this permit. The content and format of such records shall be arranged with the South Central Regional Office. These records shall include, but are not limited to:
 - a. annual usage of gel coatings and VOC emissions, calculated monthly as the sum of each consecutive twelve (12) month period. The VOC content of the materials is to be determined and certified using approved EPA test methodologies such as 40 CFR part 60, Appendix A EPA Reference Method 24 or equivalent. If it is demonstrated to the satisfaction of DEQ that coating formulation data are equivalent to Method 24 results, formulation data may be used.
 - b. destruction efficiency of the RTO
 - c. temperature of the RTO
 - d. residence time of the RTO
 - e. flow rate, including excess air, of the RTO

These records shall be available on site for inspection by the DEQ and shall be current for the most recent five (5) years.

(9 VAC 5-50-50, 9 VAC 5-80-110 and Condition II.5 of November 29, 1984 Permit, amended September 15, 1995 and April 7, 2003)

2. Visual emission observations from the fabric filter exhaust stack shall be conducted at least once per week. If visible emissions are observed, the permittee shall:
 - a. take timely corrective action such that the fabric filter resumes normal operation and there are no visible emissions from the fabric filter exhaust stack, or
 - b. perform a visible emission evaluation (VEE) in accordance with 40 CFR 60, Appendix A, Method 9 to assure visible emissions from the fabric filter does not exceed five percent opacity. The VEE shall be conducted for a minimum of six minutes. If any of the observations exceed five percent, the VEE shall be conducted for a total of 60 minutes. If compliance is not demonstrated by this VEE, timely corrective action shall be taken such that the fabric filter resumes operation with visible emissions of five percent or less.

Records shall be maintained, on site, stating the date and time of each visible emissions check and whether visible emissions were observed and any required corrective action taken. Visible emissions checks are not required during start-ups, shut-downs, and malfunctions.

(9 VAC 5-50-20)

D. Testing

The permitted facility shall be constructed so as to allow for emissions testing at any time using appropriate methods. Upon request from the Department, test ports shall be provided at the appropriate locations.

(9 VAC 5-50-30 and 9 VAC 5-80-110)

VI. Process Equipment Requirements – (OA1-OA9) an acrylic whirlpool bathware line

A. Limitations

1. The annual throughput of polyester resin shall not exceed 1635 tons, based on 42% weight styrene monomer, calculated as the sum of each consecutive 12 month period.
(9 VAC 5-80-110 and Condition 4 of February 8, 1994 Permit, amended March 27, 1998)
2. Visible emissions from the acrylic bathware line shall not exceed 5 percent opacity.
(9 VAC 5-50-80, 9 VAC 5-80-110 and Condition 6 of February 8, 1994 Permit, amended March 27, 1998)
3. Emissions from the operation of the acrylic bathware line shall not exceed the limits specified below:

Total Suspended Particulate	0.5 lbs/hr	1.7 tons/yr
PM-10	0.5 lbs/hr	1.7 tons/yr
Volatile Organic Compounds	110.0 lbs/hr	90.2 tons/yr
Styrene	100.0 lbs/hr	84.6 tons/yr

(9 VAC 5-80-110, 9 VAC 5-50-260, and Condition 5 of February 8, 1994 Permit, amended March 27, 1998)

B. Monitoring and Recordkeeping

The permittee shall maintain records of all emission data and operating parameters necessary to demonstrate compliance with this permit. The content and format of such records shall be arranged with the South Central Regional Office. These records shall include, but are not limited to:

- a. Annual throughput and VOC content of polyester resin, calculated monthly as the sum of each consecutive twelve (12) month period. The consumption shall be on a weight basis, corrected to 42% weight styrene monomer.
- b. Annual usage of PVC “glue”, including VOC emissions therefrom, calculated monthly as the sum of each consecutive twelve (12) month period.
- c. Annual VOC and styrene emissions, calculated monthly as the sum of each consecutive twelve (12) month period.

The VOC content is to be determined and certified using approved EPA test methodologies such as 40 CFR part 60, Appendix A EPA Reference Method 24 or equivalent. These records shall be available on site for inspection by the DEQ and shall be current for the most recent five (5) years.

(9 VAC 5-50-50, 9 VAC 5-80-110 and Condition 9 of February 8, 1994 Permit, amended March 27, 1998)

C. Testing

The permitted facility shall be constructed so as to allow for emissions testing at any time using appropriate methods. Upon request from the Department, test ports shall be provided at the appropriate locations.

(9 VAC 5-50-30, 9 VAC 5-80-110 and Condition 3 of February 8, 1994 Permit, amended March 27, 1998)

VII. Process Equipment Requirements – (OP1 - OP5) a mold fabrication facility

A. Limitations

1. The gel coat station shall consume no more than 9.15 tons of gel coat per year, calculated monthly as the sum of each consecutive twelve (12) month period.
(9 VAC 5-80-110 and Condition 3 of December 9, 1988 Permit, amended December 17, 1993)
2. The laminating station shall consume no more than 58.35 tons of resin per year, calculated monthly as the sum of each consecutive twelve (12) month period.
(9 VAC 5-80-110 and Condition 4 of December 9, 1988 Permit, amended December 17, 1993)

3. Visible emissions from the gel coat spray and lamination stations shall not exceed 5 percent opacity.
(9 VAC 5-50-80, 9 VAC 5-80-110 and Condition 7 of December 9, 1988 Permit, amended December 17, 1993 Permit)

4. Emissions from the operation of the gel coat station shall not exceed the limits specified below:

Volatile Organic Compounds	2.4 lbs/hr	2.6 tons/yr
----------------------------	------------	-------------

(9 VAC 5-80-110, 9 VAC 5-50-260, and Condition 5 of December 9, 1988 Permit, amended December 17, 1993 Permit)

5. Emissions from the operation of the laminating station shall not exceed the limits specified below:

Volatile Organic Compounds	4.3 lbs/hr	4.8 tons/yr
----------------------------	------------	-------------

(9 VAC 5-80-110, 9 VAC 5-50-260, and Condition 6 of December 9, 1988 Permit, amended December 17, 1993 Permit)

B. Monitoring and Recordkeeping

1. The permittee shall maintain records of all emission data and operating parameters necessary to demonstrate compliance with this permit. The content and format of such records shall be arranged with the South Central Regional Office. These records shall include, but are not limited to: annual usage and VOC content of gel coat and resin, calculated monthly as the sum of each consecutive twelve (12) month period. The VOC content is to be determined and certified using approved EPA test methodologies such as 40 CFR part 60, Appendix A EPA Reference Method 24 or equivalent. These records shall be available on site for inspection by the DEQ and shall be current for the most recent five (5) years.

(9 VAC 5-50-50, 9 VAC 5-80-110 and Condition 11 of December 9, 1988 Permit, amended December 17, 1993 Permit)

2. Visual emission observations from the gel coat spray and lamination stations exhaust stacks shall be conducted at least once per week. If visible emissions are observed, the permittee shall:
 - a. take timely corrective action such that the gel coat spray and lamination stations resume normal operation and there are no visible emissions from the gel coat spray and hand lay-up stations exhaust stacks, or

- b. perform a visible emission evaluation (VEE) in accordance with 40 CFR 60, Appendix A, Method 9 to assure visible emissions from the gel coat spray and hand lay-up stations do not exceed five percent opacity. The VEE shall be conducted for a minimum of six minutes. If any of the observations exceed five percent, the VEE shall be conducted for a total of 60 minutes. If compliance is not demonstrated by this VEE, timely corrective action shall be taken such that the gel coat spray and hand lay-up stations resume operation with visible emissions of five percent or less.

Records shall be maintained, on site, stating the date and time of each visible emissions check and whether visible emissions were observed and any required corrective action taken. Visible emissions checks are not required during start-ups, shut-downs, and malfunctions.

(9 VAC 5-50-20)

VIII. Facility Wide Conditions

A. Limitations

Unless otherwise specified in this permit, no owner or other person shall cause or permit to be discharged into the atmosphere from any affected facility any visible emissions which exhibit greater than 20 percent opacity, except for one six-minute period in any one hour of not more than 30 percent opacity as determined by EPA Method 9 (reference 40 CFR 60, Appendix A). Failure to meet the requirements of this section because of the presence of water vapor shall not be a violation of this section.

(9 VAC 5-50-80)

B. Monitoring and Recordkeeping

The permittee shall maintain records of all emission data and operating parameters necessary to demonstrate compliance with this permit. The content and format of such records shall be arranged with the South Central Regional Office. These records shall include, but are not limited to, the annual throughput of natural gas (in million cubic feet). The annual throughput shall be calculated as the sum of each consecutive twelve (12) month period. These records shall be available on site for inspection by the DEQ and shall be current for the most recent five (5) years.

(9 VAC 5-50-50, 9 VAC 5-80-110)

IX. Permit Shield & Inapplicable Requirements

Compliance with the provisions of this permit shall be deemed compliance with all applicable requirements in effect as of the permit issuance date as identified in this permit. This permit shield covers only those applicable requirements covered by terms and conditions in this permit and the following requirements which have been specifically identified as being not applicable to this permitted facility:

Citation	Title of Citation	Description of Applicability
None identified		

Nothing in this permit shield shall alter the provisions of §303 of the federal Clean Air Act, including the authority of the administrator under that section, the liability of the owner for any violation of applicable requirements prior to or at the time of permit issuance, or the ability to obtain information by (i) the administrator pursuant to §114 of the federal Clean Air Act, (ii) the Board pursuant to §10.1-1314 or §10.1-1315 of the Virginia Air Pollution Control Law or (iii) the Department pursuant to §10.1-1307.3 of the Virginia Air Pollution Control Law.

(9 VAC 5-80-140)

X. General Conditions

A. Federal Enforceability

All terms and conditions in this permit are enforceable by the administrator and citizens under the federal Clean Air Act, except those that have been designated as only state-enforceable.

(9 VAC 5-80-110 N)

B. Permit Expiration

This permit has a fixed term of five years. The expiration date shall be the date five years from the date of issuance. Unless the owner submits a timely and complete application for renewal to the Department consistent with the requirements of 9 VAC 5-80-80, the right of the facility to operate shall be terminated upon permit expiration.

1. The owner shall submit an application for renewal at least six months but no earlier than eighteen months prior to the date of permit expiration.
2. If an applicant submits a timely and complete application for an initial permit or renewal under this section, the failure of the source to have a permit or the operation of the source without a permit shall not be a violation of Article 1, Part II of 9 VAC 5 Chapter 80, until the Board takes final action on the application under 9 VAC 5-80-150.
3. No source shall operate after the time that it is required to submit a timely and complete application under subsections C and D of 9 VAC 5-80-80 for a renewal permit, except in compliance with a permit issued under Article 1, Part II of 9 VAC 5 Chapter 80.
4. If an applicant submits a timely and complete application under section 9 VAC 5-80-80 for a permit renewal but the Board fails to issue or deny the renewal permit before the end of the term of the previous permit, (i) the previous permit shall not expire until the renewal permit has been issued or denied and (ii) all the terms and conditions of the previous permit, including any permit shield granted pursuant to 9

VAC 5-80-140, shall remain in effect from the date the application is determined to be complete until the renewal permit is issued or denied.

5. The protection under subsections F 1 and F 5 (ii) of section 9 VAC 5-80-80 F shall cease to apply if, subsequent to the completeness determination made pursuant section 9 VAC 5-80-80 D, the applicant fails to submit by the deadline specified in writing by the Board any additional information identified as being needed to process the application.

(9 VAC 5-80-80 B, C and F, 9 VAC 5-80-110 D and 9 VAC 5-80-170 B)

C. Recordkeeping and Reporting

1. All records of monitoring information maintained to demonstrate compliance with the terms and conditions of this permit shall contain, where applicable, the following:
 - a. The date(s) analyses were performed.
 - b. The analytical techniques or methods used.
 - c. The results of such analyses.
 - d. The operating conditions existing at the time of sampling or measurement.

(9 VAC 5-80-110 F)

2. Records of all monitoring data and support information shall be retained for at least five years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

(9 VAC 5-80-110 F)

3. The permittee shall submit the results of monitoring contained in any applicable requirement to DEQ no later than **March 1** and **September 1** of each calendar year. This report must be signed by a responsible official, consistent with 9 VAC 5-80-80 G, and shall include:
 - a. The time period included in the report. The time periods to be addressed are January 1 to June 30 and July 1 to December 31.
 - b. All deviations from permit requirements. For purposes of this permit, deviations include, but are not limited to:

(1) Exceedance of emissions limitations or operational restrictions;

- (2) Excursions from control device operating parameter requirements, as documented by continuous emission monitoring, periodic monitoring, or compliance assurance monitoring which indicates an exceedance of emission limitations or operational restrictions; or,
- (3) Failure to meet monitoring, recordkeeping, or reporting requirements contained in this permit.

(9 VAC 5-80-110 F)

D. Annual Compliance Certification

Exclusive of any reporting required to assure compliance with the terms and conditions of this permit or as part of a schedule of compliance contained in this permit, the permittee shall submit to EPA and DEQ no later than **March 1** each calendar year a certification of compliance with all terms and conditions of this permit including emission limitation standards or work practices. The compliance certification shall comply with such additional requirements that may be specified pursuant to §114(a)(3) and §504(b) of the federal Clean Air Act. This certification shall be signed by a responsible official, consistent with 9 VAC 5-80-80 G, and shall include:

1. The time period included in the certification. The time period to be addressed is January 1 to December 31.
2. The identification of each term or condition of the permit that is the basis of the certification.
3. The compliance status.
4. Whether compliance was continuous or intermittent, and if not continuous, documentation of each incident of non-compliance.
5. Consistent with subsection 9 VAC 5-80-110 E, the method or methods used for determining the compliance status of the source at the time of certification and over the reporting period.
6. Such other facts as the permit may require to determine the compliance status of the source.

One copy of the annual compliance certification shall be sent to EPA at the following address:

Clean Air Act Title V Compliance Certification (3AP00)
U. S. Environmental Protection Agency, Region III
1650 Arch Street
Philadelphia, PA 19103-2029.

(9 VAC 5-80-110 K.5)

E. Permit Deviation Reporting

The permittee shall notify the South Central Regional Office, within four daytime business hours of any deviations from permit requirements which may cause excess emissions for more than one hour, including those attributable to upset conditions as may be defined in this permit. In addition, within 14 days of the occurrence, the permittee shall provide a written statement explaining the problem, any corrective actions or preventative measures taken, and the estimated duration of the permit deviation. The occurrence should also be reported in the next semi-annual compliance monitoring report pursuant to General Condition X.C.3. of this permit.

(9 VAC 5-80-110 F.2 and 9 VAC 5-80-250)

F. Failure/Malfunction Reporting

If, for any reason, the affected facilities or related air pollution control equipment fails or malfunctions and may cause excess emissions for more than one hour, the owner shall notify the South Central Regional Office, within four (4) daytime business hours of the occurrence. In addition, the owner shall provide a written statement, within 14 days, explaining the problem, corrective action taken, and the estimated duration of the breakdown/shutdown.

(9 VAC 5-80-250)

G. Severability

The terms of this permit are severable. If any condition, requirement or portion of the permit is held invalid or inapplicable under any circumstance, such invalidity or inapplicability shall not affect or impair the remaining conditions, requirements, or portions of the permit.

(9 VAC 5-80-110 G.1)

H. Duty to Comply

The permittee shall comply with all terms and conditions of this permit, including those terms and conditions set forth in a tabular format. Any permit noncompliance constitutes a violation of the federal Clean Air Act or the Virginia Air Pollution Control Law or both and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or, for denial of a permit renewal application.

(9 VAC 5-80-110 G.2)

I. Need to Halt or Reduce Activity not a Defense

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
(9 VAC 5-80-110 G.3)

J. Permit Action for Cause

A physical change in, or change in the method of operation of, this stationary source may be subject to permitting under State Regulations 9 VAC 5-80-50, 9 VAC 5-80-1100, 9 VAC 5-80-1790, or 9 VAC 5-80-2000 and may require a permit modification and/or revisions except as may be authorized in any approved alternative operating scenarios.
(9 VAC 5-80-190 and 9 VAC 5-80-260)

K. Property Rights

The permit does not convey any property rights of any sort, or any exclusive privilege.
(9 VAC 5-80-110 G.5)

L. Duty to Submit Information

1. The permittee shall furnish to the Board, within a reasonable time, any information that the Board may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Board copies of records required to be kept by the permit and, for information claimed to be confidential, the permittee shall furnish such records to the Board along with a claim of confidentiality.
(9 VAC 5-80-110 G.6)
2. Any document (including reports) required in a permit condition to be submitted to the Board shall contain a certification by a responsible official that meets the requirements of 9 VAC 5-80-80 G.
(9 VAC 5-80-110 K.1)

M. Duty to Pay Permit Fees

The owner of any source for which a permit under 9 VAC 5-80-50 through 9 VAC 5-80-305 was issued shall pay permit fees consistent with the requirements of 9 VAC 5-80-310 through 9 VAC 5-80-355. The actual emissions covered by the permit program fees for the preceding year shall be calculated by the owner and submitted to the Department by **April 15** of each year. The calculations and final amount of emissions are subject to verification and final determination by the Department.
(9 VAC 5-80-110 H and 9 VAC 5-80-340 C)

N. Fugitive Dust Emission Standards

During the operation of a stationary source or any other building, structure, facility, or installation, no owner or other person shall cause or permit any materials or property to be handled, transported, stored, used, constructed, altered, repaired, or demolished without taking reasonable precautions to prevent particulate matter from becoming airborne. Such reasonable precautions may include, but are not limited to, the following:

1. Use, where possible, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of land;
2. Application of asphalt, water, or suitable chemicals on dirt roads, materials stockpiles, and other surfaces which may create airborne dust; the paving of roadways and the maintaining of them in a clean condition;
3. Installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty material. Adequate containment methods shall be employed during sandblasting or other similar operations;
4. Open equipment for conveying or transporting material likely to create objectionable air pollution when airborne shall be covered or treated in an equally effective manner at all times when in motion; and,
5. The prompt removal of spilled or tracked dirt or other materials from paved streets and of dried sediments resulting from soil erosion.

(9 VAC 5-50-90)

O. Startup, Shutdown, and Malfunction

At all times, including periods of startup, shutdown, soot blowing, and malfunction, owners shall, to the extent practicable, maintain and operate any affected facility including associated air pollution control equipment in a manner consistent with air pollution control practices for minimizing emissions. Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Board, which may include, but is not limited to, monitoring results, opacity observations, review of operating and maintenance procedures, and inspection of the source.

(9 VAC 5-50-20)

P. Alternative Operating Scenarios

Contemporaneously with making a change between reasonably anticipated operating scenarios identified in this permit, the permittee shall record in a log at the permitted facility a record of the scenario under which it is operating. The permit shield described in 9 VAC 5-80-140 shall extend to all terms and conditions under each such operating scenario. The terms and conditions of each such alternative scenario shall meet all applicable requirements including the requirements of 9 VAC 5 Chapter 80, Article 1. (9 VAC 5-80-110 J)

Q. Inspection and Entry Requirements

The permittee shall allow DEQ, upon presentation of credentials and other documents as may be required by law, to perform the following:

1. Enter upon the premises where the source is located or emissions-related activity is conducted, or where records must be kept under the terms and conditions of the permit.
2. Have access to and copy, at reasonable times, any records that must be kept under the terms and conditions of the permit.
3. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit.
4. Sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

(9 VAC 5-80-110 K.2)

R. Reopening For Cause

The permit shall be reopened by the Board if additional federal requirements become applicable to a major source with a remaining permit term of three years or more. Such reopening shall be completed no later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to 9 VAC 5-80-80 F.

1. The permit shall be reopened if the Board or the administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

2. The permit shall be reopened if the administrator or the Board determines that the permit must be revised or revoked to assure compliance with the applicable requirements.
3. The permit shall not be reopened by the Board if additional applicable state requirements become applicable to a major source prior to the expiration date established under 9 VAC 5-80-110 D.

(9 VAC 5-80-110 L)

S. Permit Availability

Within five days after receipt of the issued permit, the permittee shall maintain the permit on the premises for which the permit has been issued and shall make the permit immediately available to DEQ upon request.

(9 VAC 5-80-150 E)

T. Transfer of Permits

1. No person shall transfer a permit from one location to another, unless authorized under 9 VAC 5-80-130, or from one piece of equipment to another.
(9 VAC 5-80-160)
2. In the case of a transfer of ownership of a stationary source, the new owner shall comply with any current permit issued to the previous owner. The new owner shall notify the Board of the change in ownership within 30 days of the transfer and shall comply with the requirements of 9 VAC 5-80-200.
(9 VAC 5-80-160)
3. In the case of a name change of a stationary source, the owner shall comply with any current permit issued under the previous source name. The owner shall notify the Board of the change in source name within 30 days of the name change and shall comply with the requirements of 9 VAC 5-80-200.
(9 VAC 5-80-160)

U. Malfunction as an Affirmative Defense

1. A malfunction constitutes an affirmative defense to an action brought for noncompliance with technology-based emission limitations if the conditions of paragraph 2 of this condition are met.
2. The affirmative defense of malfunction shall be demonstrated by the permittee through properly signed, contemporaneous operating logs, or other relevant evidence that show the following:

- a. A malfunction occurred and the permittee can identify the cause or causes of the malfunction.
 - b. The permitted facility was at the time being properly operated.
 - c. During the period of malfunction, the permittee took all reasonable steps to minimize levels of emissions that exceeded the emissions standards or other requirements in the permit.
 - d. The permittee notified the board of the malfunction within two working days following the time when the emission limitations were exceeded due to the malfunction. This notification shall include a description of the malfunction, any steps taken to mitigate emissions, and corrective actions taken. The notification may be delivered either orally or in writing. The notification may be delivered by electronic mail, facsimile transmission, telephone, or any other method that allows the permittee to comply with the deadline. This notification fulfills the requirements of 9 VAC 5-80-110 F 2 b to report promptly deviations from permit requirements. This notification does not release the permittee from the malfunction reporting requirement under 9 VAC 5-20-180 C.
3. In any enforcement proceeding, the permittee seeking to establish the occurrence of a malfunction shall have the burden of proof.
 4. The provisions of this section are in addition to any malfunction, emergency or upset provision contained in any requirement applicable.

(9 VAC 5-80-250)

V. Permit Revocation or Termination for Cause

A permit may be revoked or terminated prior to its expiration date if the owner knowingly makes material misstatements in the permit application or any amendments thereto or if the permittee violates, fails, neglects or refuses to comply with the terms or conditions of the permit, any applicable requirements, or the applicable provisions of 9 VAC 5 Chapter 80 Article 1. The Board may suspend, under such conditions and for such period of time as the Board may prescribe, any permit for any of the grounds for revocation or termination or for any other violations of these regulations.

(9 VAC 5-80-260)

W. Duty to Supplement or Correct Application

Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrections. An applicant shall also provide additional information as necessary to address any requirements that become applicable to the source after the date a complete application was filed but prior to release of a draft permit.

(9 VAC 5-80-80 E)

X. Stratospheric Ozone Protection

If the permittee handles or emits one or more Class I or II substances subject to a standard promulgated under or established by Title VI (Stratospheric Ozone Protection) of the federal Clean Air Act, the permittee shall comply with all applicable sections of 40 CFR Part 82, Subparts A to F.

(40 CFR Part 82, Subparts A-F)

Y. Accidental Release Prevention

If the permittee has more, or will have more than a threshold quantity of a regulated substance in a process, as determined by 40 CFR 68.115, the permittee shall comply with the requirements of 40 CFR Part 68.

(40 CFR Part 68)
